

Alpine, WY

We took a scenic rafting trip on the beautiful Snake River. The river is very low, and this is their last week of rafting before winter sets in. During the spring and summer this part of the river is the white-water rapid float, so all the rapids have names and ratings. The water is so clear one can see many feet to the bottom. We saw a lot of eagles but not much other wildlife. Video [one](#), [two](#) and [three](#).
